

## ASSOCIATE OF ARTS AND SCIENCE DEGREE WITH EMPHASIS

### WHAT IS AN EMPHASIS?

UW-Marquette offers students the opportunity to earn an Associate of Arts and Science (AAS) Degree with a specific area of emphasis. An emphasis is a concentration of course work in a given discipline or area of study. Completing an AAS Degree with an area of emphasis is not a requirement; it is an option to enhance the overall general studies associate degree.

When considering an area of emphasis, there are two important points to remember:

- Bachelor's degree programs into which a student can transfer are not limited to this set of emphases. The AAS Degree is an excellent start toward most four year majors.
- Careful transfer planning is still important and necessary beyond completing requirements for an emphasis.

### EMPHASIS PROGRAMS AVAILABLE AT UW-MARINETTE:

Anthropology	Geography	Physics
Biology	Geosciences	Pre-Nursing
Business	Health Sciences	Psychology
Chemistry	History	Sociology
Computer Science	Literature	Theatre
Education	Math	Women's Studies
Engineering	Music	
Environmental Science	Philosophy	

### BENEFITS OF COMPLETING AN ASSOCIATE OF ARTS & SCIENCE DEGREE WITH EMPHASIS

- Provides focus for the first two years of study.
- Expands knowledge and skills in a particular area of personal, professional or academic interest.
- Offers the opportunity to "test drive" an academic major for a bachelor's degree.
- Communicates a specific area of interest of expertise by adding definition to the general studies Associate of Arts & Science Degree.
